FIRST GLOBAL DEFI SMARTBANK*
unlimited financial freedom

InDeFiEco.com

Thank you for your attention and interest in the InDeFiEco project. We are confident that together we can achieve impressive results.

Our team engaged professionals who have proven themselves over the years in various spheres: banking, finance, blockchain and cryptocurrencies, public life, charity and many others.

Targets and principles of the Ecosystem are fixed in the Memorandum ("Our Mission") and the Protocol ("White Paper") posted on the website. Our main purpose is your wealth, therefore we have prepared for you extremely interesting offers that will allow you to preserve and multiply your assets.

Many projects are launched with the intention of doing something. Unlike them, we already have competence and developments in the DeFi, which has provided consistent results for our partners. Right now you can earn a yield on the deposited DAI in the amount of 10 to 15% p.a. This profitable model has been operating for more than six months.

At the same time, you have the opportunity to participate in the initial distribution of 10% of InDeFiEco managing tokens, which will start on December 16 and will finish on December 27. You can supply liquidity to InDeFiEco on a returnable basis for 90 days. As a reward, you, as a project partner, will receive for free on the most favorable terms xIDF tokens, which will be distributed at the end of the round among its participants in proportion to their contributions.

After the main launch of the project, you will be able to exchange at no additional cost xIDF tokens for the main IDF managing tokens, which will be freely traded on the market. The funds you supplied will be invested in standard deposit models with profit depending on the type of asset, or you can withdraw them in the same amount in which they were supplied.

Algorithm for participation in token distribution:

1. Open to the website https://xidf.indefieco.com/

2. Authorize with MetaMask (https://metamask.io)

3. Select the asset that the you want to contribute (DAI \ ETH \ USDC \ wBTC \ USDT) in order to receive xIDF.

4. Click the "Unblock tokens" button so that the smart contract can write them off. You must wait for the execution of transaction. If the transaction is not processed for a long time, refresh the page (F5).

5. Indicate in the "Amount {Selected Asset}" the number of tokens to be frozen and click the "Replenish" button. You must wait for the execution of transaction. If the transaction is not processed for a long time, refresh the page (F5).

6. After that, the you can see your xIDF balance expected for accrual, as well as the number of frozen tokens.

7. 3 days after the last deposit transaction in the period from December 16 to December 27, 2020 will be executed, the you can request your tokens. If the you transfer part of his tokens to someone, you will be able to return only a part of the supplied funds (in proportion to the remaining stake of the tokens). The opportunity to withdraw the deposited funds without returning xIDF tokens will be available 90 days after finishing the initial distribution.

If you have any technical difficulties, please contact the support service: support@indefieco.com

Sincerely,

InDeFiEco Team
